PROJECT OVERVIEW

A collaborative chat app designed specifically for developers and programmers.

Target Audience

Developers and Programmers

Goal:

Develop a fully functional
chat application with
features tailored
to developers'
workflow.

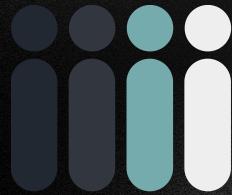

Unique Feature

The Whiteboard:
A Collaborative Writing Space

Creative Direction: Colour Palette

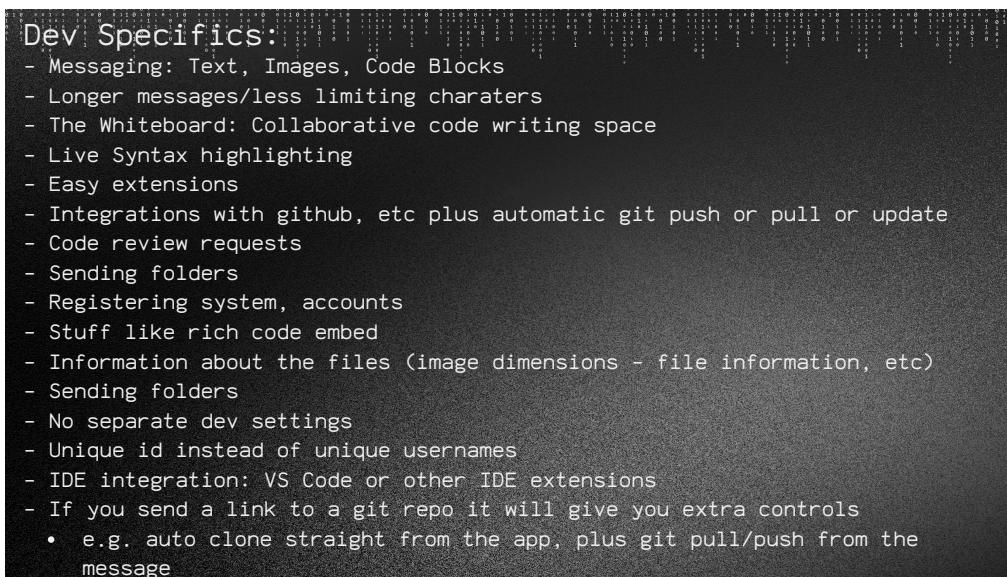

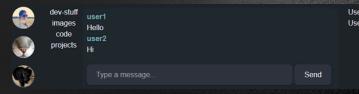

Creative Direction: Typography

Fonts
To Be
Decided

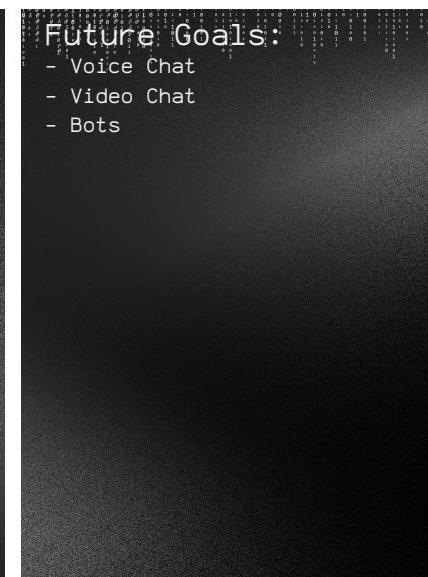

Creative Direction: Appearance

Dev Specifics:

- Messaging: Text, Images, Code Blocks
- Longer messages/less limiting characters
- The Whiteboard: Collaborative code writing space
- Live Syntax highlighting
- Easy extensions
- Integrations with github, etc plus automatic git push or pull or update
- Code review requests
- Sending folders
- Registering system, accounts
- Stuff like rich code embed
- Information about the files (image dimensions - file information, etc)
- Sending folders
- No separate dev settings
- Unique id instead of unique usernames
- IDE integration: VS Code or other IDE extensions
- If you send a link to a git repo it will give you extra controls
 - e.g. auto clone straight from the app, plus git pull/push from the message

Future Goals:

- Voice Chat
- Video Chat
- Bots
